The Hiring Manager
Deepmind

Dear Sir/Madam,

As an experienced Sr. Research Engineer at one of [India's largest and leading data generating companies in the geospatial industry](#), the posting for Data Research Engineer with deepmind piqued my interest. While reviewing the job requirements and your website, I was excited to see that what I've been doing for the last 1.5 years in the data-centric machine learning and deep learning domain aligns with your needs and the mission.

I bring a set of talents unlike any regular (research) engineer. Throughout my IT journey I've had the privilege to wear multiple hats - Research engineer, Lead Engineer & Data Scientist, NLP Engineer, ML Engineer, Full stack developer, Augmented Reality Developer, Co-founder etc. with the ability to work in diverse teams and manage them as well. And I have also focused more on applications over publishing research papers.

I am applying for a part-time role but am willing to work overtime as a full-time employee because I believe in the impact that I can make at Deepmind.

Please review my attached resume. I would like to schedule an interview at your earliest convenience. I look forward to discussing how my personality and work history fit the Data Research Engineer role.

Thankyou for your time and consideration.

Sincerely,
Asapanna Rakesh
